IN THE CLAIMS

Claims 1. to 6. (cancelled)

- 7. (currently amended) A method of enhancing the nutritional value energetic and protein content of a food without affecting the taste of the food, which comprise providing a powder composition of neutral flavor comprising at least one fat or oil source, least one protein source, and maltodextrin, wherein the energetic amount of protein is between about 20% and 30%, the energetic amount of fat or oil is between about 40% and 50%, and the energetic amount of maltodextrin is between about 25% and 35% f the composition; and adding the powder composition to a food wherein the powder composition does not change the flavor of the food.
- 8. (original) The method of claim 7, wherein the food is a soup, a gravy, a vegetable, a meat, cooked potatoes, or liquid coffee.
- 9. (original) The method of claim 7, wherein the food is milk, ice cream, or a beverage.
- 10. (previously presented) The method of claim 7, wherein powder composition further comprises an emulsifier.
- 11. (original) The method of claim 7, wherein the fat or oil source is selected from the group consisting of soy oil, corn oil, rapeseed oil, sunflower oil, palmolein, or a mixture thereof.
- 12. (original) The method of claim 7, wherein fat or oil source consists substantially of canola oil.
- 13. (previously presented) The method of claim 7, wherein the at least one fat or oil source is milk fat.

14. (previously presented) The method of claim 7, wherein the one fat or oil source is milk fat, and further wherein the protein is taken from the group consisting of whey protein, casein, a casein salt and a mixture thereof.

15. (cancelled)

- 16. (previously presented) The method of claim 7, wherein the energetic amount of protein is between about 23% and 27%, the energetic amount of fat or oil is between about 43% and 47%, and the energetic amount of maltodextrin is between about 28% and 32%.
- 17. (previously presented) The method of claim 7, wherein the energetic amount of protein is about 25%, the energetic amount of fat or oil is about 45%, and the energetic amount of maltodextrin is about 30%.
- 18. (original) The method of claim 7, wherein the composition is packed in dosages of between about 10 grams to about 20 grams.
- 19. (amended herein) The method of claim 7, wherein the composition further comprises a prebiotic, a flavor enhancer, an emulsifier, a thickener, or a combination thereof.
- 20. (original) The method of claim 7, wherein the composition further comprises vitamins, minerals, micronutrients, antioxidants, or a combination thereof.
- 21. (previously presented) The method of claim 7, wherein the protein comprises whey, casein, casein salt, or a mixture thereof, corn syrup is present as a carbohydrate, and the oil comprises canola oil.
- 22. (previously presented) The method of claim 7, wherein the step of providing the method of powder composition of neutral flavor comprises admixing between about 0.8 and 1.2 parts fat or oil, between about 1.5 and 2 parts maltodextrin, between about 1.2 and 1.6 parts protein, between about 0.01 and 0.03 parts emulsifier, and between 1.1 and about 1.7 parts water to form a mixture; heating the mixture to between about 70° C and about 85°C; homogenizing the mixture; and drying the mixture to form a free flowing powder.
